COMBUSTION AND FLAME

THE JOURNAL OF THE COMBUSTION INSTITUTE

VOLUME 111 NUMBERS 1/2 OCTOBER 1997

Contents

J. P. H. SANDERS (Berkeley, CA), J.-Y. CHEN, and I. GÖKALP (Orléans, France)
Flamelet-Based Modeling of NO Formation in Turbulent Hydrogen Jet Diffusion Flames 1
L. MUÑIZ and M. G. MUNGAL (Stanford, CA)
Instantaneous Flame-Stabilization Velocities in Lifted-Jet Diffusion Flames 16

J. G HOFFMANN (Baden, Switzerland), R. ECHIGO, H. YOSHIDA and S. TADA (Tokyo, Japan)
Experimental Study on Combustion in Porous Media with a Reciprocating Flow System 32

CONSTANTIN PETROV and AHMED GHONIEM (Cambridge, MA)
A Uniform Strain Model of Elemental Flames in Turbulent Combustion Simulations 47

ALEXANDER S. MUKASYAN, SERGEY G. VADCHENKO, and IGOR O. KHOMENKO (Chernogolovka, Russia)
Combustion Modes in the Titanium–Nitrogen System at Low Nitrogen Pressures 65

J. WORMHOUDT, P. L. KEBABIAN, and C. E. KOLB (Billerica, MA)
Embedded Infrared Fiber Optic Absorption Studies of Nitramine Propellant Strand Burning 73

BRADLEY A. WILLIAMS and LOUISE PASTERNACK (Washington, DC)
The Effect of Nitric Oxide on Premixed Flames of CH_4, C_2H_6, C_2H_4, and C_2H_2 87

T. ABBAS, J. CHAROENSUK, P. COSTEN, and F. C. LOCKWOOD (London, UK)
The Performance of Pulverized-Coal Flames in a Simulated Combined Cycle Unit 111

T. M. CAIN (Hampshire, England)
Autoignition of Hydrogen at High Pressure 124

VOLUME 111 NUMBER 3 NOVEMBER 1997

Contents

D. F. MCMILLEN, D. C. ERLICH, C. HE, C. H. BECKER, and D. A. SHOCKEY (Menlo Park, CA)
Fracture-induced and Thermal Decomposition of NTO Using Laser Ionization Mass Spectrometry 133
YURY I. DIMITRIENKO (Moscow Region, Russia)
Modeling of Erosion Combustion of Energetic Materials in High-Enthalpy Flows 161

R. MITAL, J. P. GORE, and R. VISKANTA (West Lafayette, IN)
A Study of the Structure of Submerged Reaction Zone in Porous Ceramic Radiant Burners 175

(continued on next page)

KERMIT C. SMYTH, CHRISTOPHER R. SHADDIX, and DAVID A. EVEREST (Gaithersburg, MD)
Aspects of Soot Dynamics as Revealed by Measurements of Broadband Fluorescence and Flame Luminosity in Flickering Duffusion Flames 185

MICHAEL A. T. MARRO, MICHAEL A. PIVOVAROV, and J. HOUSTON MILLER (Washington, DC)
Strategy for the Simplification of Nitric Oxide Chemistry in a Laminar Methane/Air Diffusion Flamelet 208

N. N. SMIRNOV and V. F. NIKITIN (Moscow, Russia)
Unsteady-State Turbulent Diffusive Combustion in Confined Volumes 222

VOLUME 111 NUMBER 4 DECEMBER 1997

Contents

MARK ULITSKY, and LANCE R. COLLINS (University Park, PA)
Relative Importance of Coherent Structures vs Background Turbulence in the Propagation of a Premixed Flame 257

ZHUANG SHU, SURESH K. AGGARWAL, VISWANATH R. KATTA, and ISHWAR K. PURI (Chicago, IL)
Flame–Vortex Dynamics in an Inverse Partially Premixed Combustor: The Froude Number Effects 276

ZHUANG SHU, SURESH K. AGGARWAL, VISWANATH R. KATTA, and ISHWAR K. PURI (Chicago, IL)
A Numerical Investigation of the Flame Structure of an Unsteady Inverse Partially Premixed Flame 296

M. RINNEMO (Göteborg, Sweden), O. DEUTSCHMANN, F. BEHRENDT (Heidelberg, Germany), and B. KASEMO (Göteborg, Sweden)
Experimental and Numerical Investigation of the Catalytic Ignition of Mixtures of Hydrogen and Oxygen on Platinum 312

J. F. GRIFFITHS, P. A. HALFORD-MAW, and C. MOHAMED (Leeds, England)
Spontaneous Ignition Delays as a Diagnostic of the Propensity of Alkanes to Cause Engine Knock 327

M. HAUDIQUERT, A. CESSOU, D. STEPOWSKI, and A. COPPALLE (Mont-Saint-Aignan, France)
OH and Soot Concentration Measurements in a High-Temperature Laminar Diffusion Flame 338

Brief Communication

R. H. ESSENHIGH (Columbus, OH), and A. M. MESCHER (Seattle, WA)
Mechanism of Carbon Combustion: Relative Influence of Adsorption, Desorption, and Boundary Layer Diffusion as a Function of Pressure 350

Book Review 353

Author Index 354

Subject Index 363
